

# Vorlesung Open Data

## Aid Transparency und Open Aid

**Termin 10, 2. Mai 2019**

Dr. Matthias Stürmer

Dozentur Digitale Nachhaltigkeit  
Institut für Wirtschaftsinformatik  
Universität Bern

# Terminübersicht Vorlesung

21. Februar 2019	Informationen zur Vorlesung, Einführung Open Data
28. Februar 2019	Open Government Data und das Impact Measuring Framework
7. März 2019	Digitale Nachhaltigkeit und Open Data
14. März 2019	Entstehung und Anwendung des Öffentlichkeitsgesetz
21. März 2019	Geistiges Eigentum und die Open-Bewegung
28. März 2019	Open Data Journalism
4. April 2019	Open Finance und Participatory Budgeting
11. April 2019	Open Transport Data
18. April 2019	Open Geodata
25. April 2019	Semesterferien
<b>2. Mai 2019</b>	<b>Aid Transparency und Open Aid</b>
9. Mai 2019	Linked Data und Semantic Web
16. Mai 2019	Open Corporate Data
23. Mai 2019	keine Vorlesung, am Nachmittag Abschlusspräsentationen Open Data Apps
30. Mai 2019	Auffahrt

# Agenda

1. Einführung Aid Transparency und Open Data
2. International Aid Transparency Initiative (IATI)
3. Open Aid Plattformen
4. Aid Transparency Index

# Challenges with Intransparent Aid Data

## 1. Challenges for donor governments:

- > **Donor governments** don't know what other donors are spending or planning to spend.
- > This is leading to the **duplication of efforts** in some areas and underfunding in others.
- > Without aid transparency, donors cannot **coordinate** to achieve the maximum impact with their scarce resources.

Quelle: <https://www.publishwhatyoufund.org/why-transparency-matters/>

# Challenges with Intransparent Aid Data

## 2. Challenges for recipient governments:

- > **Recipient governments** struggle to know how much aid is invested in their country, let alone where and how it is spent.
- > When donors don't publish their spending plans, this impedes the recipient's ability to **plan long term projects**, which in turn hinders development.
- > When recipients can't include aid flows in their budgets and planning, it is hard for parliament and civil society to **hold them to account**.

Quelle: <https://www.publishwhatyoufund.org/why-transparency-matters/>

# Challenges with Intransparent Aid Data

## 3. Challenges for civil society:

- > **Civil society**, including NGOs, legislators and citizens, have the right to know what aid is coming into the country and what it's being spent on.
- > More and better information about aid will increase the incentive to **improve the effectiveness of aid** and fulfill taxpayers' need to know that money is being well spent.

Quelle: <https://www.publishwhatyoufund.org/why-transparency-matters/>

# Challenges with Intransparent Aid Data

## Conclusion:

- > **Knowing what is being spent where, by whom, and with what results is the basic foundation for increasing aid effectiveness.**
- > “48% of Rwanda’s national budget comes from donors. Our home revenues cannot handle every citizen’s concerns, but good governance and transparency requires funds to be allocated according to our needs.” – *Alexis Nkurunziza, Collective Leagues and Associations of Defense of Human Rights*

# International Aid Transparency Initiative (IATI)

Quelle: [https://www.youtube.com/watch?v=PbwIUQwL\\_Jc](https://www.youtube.com/watch?v=PbwIUQwL_Jc)

# There's lots of information available but it's...

**Different formats**

**Hard to find**

**Not current**

**Not  
comparable**

**Inconsistent**

**In multiple  
locations**

**Not forward  
looking**

**Not  
comprehensive**

Quelle: <https://iatistandard.org/en/about/>

# IATI enables organisations to publish data that is...

**In a standardised  
format**

**Updated  
Regularly**

**From a range  
of actors**

**All in one place**

**Forward looking**

**Comparable**

Quelle: <https://iatistandard.org/en/about/>

# International Aid Transparency Initiative (IATI)

- > International Aid Transparency Initiative (IATI) is a voluntary, multi-stakeholder **initiative** that seeks to improve the **transparency** of aid, development, and humanitarian resources in order to increase their **effectiveness** in tackling poverty.
- > IATI brings together **donor and recipient countries, civil society organisations**, and other experts in aid information who are committed to working together to increase the transparency and openness of aid.

Quelle: <https://iatistandard.org/en/about/>

# IATI Standard

- > At the centre of IATI is the **IATI Standard**, a format and framework for publishing data on development cooperation activities, intended to be **used by all organisations in development**, including government donors, private sector organisations, and national and international NGOs.
- > Organisations implement IATI by publishing their **aid information** in IATI's agreed electronic format (XML) – usually on their website – before linking it to the **IATI Registry**. The Registry acts as an online catalogue and index of links to all of the raw data published to the IATI Standard.

Quelle: <https://iatistandard.org/en/about/>

# Problems in current aid data

Information on development cooperation is already available, but can be **problematic to use**. Data from various sources is often:

- > In different, sometimes **incompatible, formats**, making it difficult to mash up datasets
- > Difficult to find on various **aid management systems**
- > **Out of date**
- > Using **inconsistent vocabularies**, definitions, and measures
- > Inconsistencies in the way in which elements or fields are **being reported or measured**
- > Not all accessible from a **single source**
- > Mostly **not forward-looking**, reporting past activity only
- > Restricted largely to traditional bilateral and multilateral donors, creating an **incomplete picture of development**

Quelle: <https://iatistandard.org/en/about/iati-standard/>

# Solution with IATI

IATI has been designed to **enable all organisations to:**

- > Publish in the same format as other organizations, so datasets from various sources can be **easily combined**
- > Update their data on a monthly, quarterly, or six-monthly basis, to **keep information as current** as possible
- > Publish data using a **flexible standard**, regardless of the kind of development cooperation provider
- > Publish in one **central location**. The IATI Registry provides links to the data published by all organisations using the IATI Standard
- > Provide, where possible, **forward-looking information**, enabling developing country governments to plan and budget more clearly and comprehensively

# Export SQL in IATI

The screenshot shows the GitHub repository page for 'DFID / SQL-to-IATI-Database'. At the top, there's a navigation bar with the GitHub logo, a search bar, and links for Pull requests, Issues, Marketplace, and Explore. The repository name 'DFID / SQL-to-IATI-Database' is displayed, along with statistics: 11 Watchers, 4 Stars, and 1 Fork. Below this, there's a tabbed interface with 'Code' selected, and links for Issues (0), Pull requests (0), Projects (0), Wiki, and Insights. The main content area contains a description of the repository, stating it contains SQL scripts for building DFID's IATI v203 database. It also includes a list of tags: iati, sql, sql-server, iati-activity, database-script, and dfid. A summary bar shows 16 commits, 2 branches, 0 releases, 3 contributors, and the MIT license. At the bottom, there's a 'Branch: master' dropdown, a 'New pull request' button, and buttons for 'Create new file', 'Upload files', 'Find File', and 'Clone or download'. A recent commit by 'g-shafiullah' is shown, merging pull request #1 from 'DFID/Update-readme.md-file', with the latest commit hash 'ef33b6c' dated 'Sep 12, 2018'.

## Welcome to Openaid.se

Openaid.se is a web-based information service about Swedish aid built on open government

Quelle: <https://openaid.se/aid/2018/>

## About the Swedish Open Aid Portal

- > The goal is to fight poverty as effectively as possible. To achieve this goal, **aid has to be open to public control** and ideas from more sources.
- > In 2010, a **transparency guarantee** was introduced to Swedish development assistance. The guarantee means that public documentation and information about Swedish aid are actively made available on the Web. The website for this is **Openaid.se**, a web-based information service about Swedish aid built on open government data.
- > Parts of the aid information are **subject to confidentiality** and therefore excluded from publication on Openaid.se. This is because cooperative partners and individuals may be harmed by its publication.

# Insight into development aid: open data of the Dutch government

- > This platform extracts the raw **IATI** data published by the Dutch Ministry of Foreign Affairs from the IATI registry, and presents it in an easy-to-use web interface. It does **not alter or interpret the data** in any way.
- > Transparency of development aid enhances the **effectiveness and quality** of development aid.
- > **Governments** of developing countries are able to plan better when they have access to **accurate and up-to-date information** about aid flows into their countries. **Citizens** in developing countries can hold their **governments accountable** for the spending of aid. The **Dutch public** gets a **better picture** of how public money is spent.
- > The value of open data is greatly increased if it can be compared and added up internationally. **The International Aid Transparency Initiative (IATI)** aims to do just that – to develop an international standard for the publication of aid data.

Status: **Implementation**

Reporting Org: **Department for International Development**

To reduce hunger, improve livelihoods and reduce the risk of famine in rural Ethiopia by (i) providing cash and food transfers, livelihoods advice and access to microfinance to 1.2 million extremely poor Ethiopians and (ii) creating local infrastructure which reverses environmental degradation and improves access to markets and basic services. 85% of participant households receive transfers as wages for labour on public works projects (including 32,000 km of hillside terraces, 3,000 km of rural roads and 400 new or expanded schools); while the remainder (the elderly, those with disabilities, and pregnant women) receive cash and / or food without a labour requirement. This programme contributes towards national and international development goals and DFID's own targets for reducing poverty and hunger and for building household resilience to climate change and other shocks.

## About the UK Open Aid Portal

- > **The Development Tracker** allows you to find and explore detailed information on international development projects funded by the UK Government.
- > The tracker is built using open data published by UK Government and partners, using the **International Aid Transparency Initiative (IATI) standard**.
- > The site also contains an **API (application programming interface)** enabling developers to retrieve the data in JSON format.
- > The source code for the Development Tracker is available at **GitHub.com/dfid** so that others can freely re-use or even contribute to the code.

# Content of Open.undp.org

- > Open.undp.org presents **UNDP's 6,000+ development projects** and 8,000 outputs in 177 countries and territories worldwide.
- > It represents UNDP's commitment to publish comprehensive, quality and timely **information about aid flows and results.**
- > Open.undp.org is a component of our implementation of the **International Aid Transparency Initiative (IATI)** to which UNDP is a signatory.
- > Open.undp.org enables users to find project information categorized broadly by **location, funding source, and focus areas**, and drill down for comprehensive **project data**, including budget, expenditure, completion status, implementing organization, contribution to gender equality, project documents, and more.

# Legal and Technical Aspects

- > All data in open.undp.org can be used free of charge in compliance with the **Creative Commons' Attribution License (CC-BY)**.
- > You can download data in **IATI XML, CSV, and JSON formats**, as a whole database or for individual countries, regions, or sectors.
- > You can **download a snippet of code** to embed in your website and to visually depict data subsets (look for the "Embed" button).
- > For developers, data is available as an **API (JSON)**. A Web API is a way for other web sites to access data directly. It is the interface of choice for creating custom data visualizations, live combinations with other data sources, and more.

## Switzerland – Agency for Development and Cooperation (SDC)

### OVERVIEW

The Swiss Agency for Development and Cooperation (SDC) is responsible for the overall coordination of development and cooperation with Eastern Europe, as well as for humanitarian aid delivered by the Swiss Confederation. Switzerland-SDC is not an IATI member but first published IATI data in November 2013.

SCORE: 50.9

POSITION: 28 / 45

# Aid Transparency Index 2018: Verbesserungsvorschläge

- > Switzerland-SDC continues to publish to version 1.03 of the IATI standard – one of the oldest versions. It should update to a **newer version of the Standard** so as to take full advantage of the benefits it offers.
- > Switzerland-SDC should resume **quarterly publications**, if not aim for monthly publications.
- > Switzerland-SDC should improve the **comprehensiveness** of its publication to include project budget information as well as contracts and tenders.
- > It should prioritise the publication of **performance-related information**, including pre-project impact appraisals, reviews and evaluations, and results.
- > To demonstrate the impact of transparency on development work, Switzerland-SDC should take responsibility to **promote the use of the data they publish**: internally, to promote coordination and effectiveness; and externally, to explore online and in-person feedback loops, including at country-level.
